

ABBOJU NIKHIL

nikhilnike2910@gmail.com

7382953607

Mandamarri, Telangana, 504231

LinkedIn: <https://www.linkedin.com/in/nikhil1197/>

Career Objective:

Motivated Computer Science Engineering student with strong skills in Python, SQL, and data analysis. Interested in trainee roles involving research, documentation, and project support. Eager to contribute to team-based environments and continuously learn through training and practical exposure.

Education

Malla Reddy Institute of Technology and Science

Nov 2022 – July 2025

Bachelor of Technology in Computer Science

Engineering

- GPA: 7.2

June 2019 – April 2022

Government Polytechnic College Bellampalli

Diploma in Electrical Electronic Engineering

- GPA: 8.63

Mother Teresa High School

June 2018 – April 2019

- GPA: 9.0

Internship

Python Programming Intern (CODSOFT)

Remote April 2025 – May 2025

- Designed and developed multiple Python applications focusing on modular programming, file handling, and data management.
- Implemented structured logic, input validation, and exception handling to build scalable console-based utilities.
- Applied core OOP principles, data structures, and algorithmic thinking to develop task management and data-processing tools.
- Strengthened debugging, code optimization, and problem-solving skills through real-world project implementation.

Certificates

- Python Programming - Codsoft
- Python Programming - CS CODENZ
- Post Graduate Diploma in Computer Applications – HRDS (MS Word, Excel, Powerpoint)

Projects

Integrated ML with NLP Framework for Drug Recommendation System

- Developed a smart recommendation system using Natural Language Processing (NLP) and Machine Learning techniques to suggest appropriate drugs based on symptoms or patient inputs.

- Implemented backend logic using Python and modular architecture.
- Integrated API-like structured flow with Tkinter UI.
- Used data preprocessing pipelines similar to backend services.
- Developed using modular programming principles and followed structured software development approach.
- Tools Used: Python, Scikit-learn, NLTK, TF-IDF, Logistic Regression / SVM, Tkinter (for GUI), Pandas

Cartoonifier Image using OpenCV and Python

- Built a real-time image processing tool that transforms normal images into cartoon-style visuals using OpenCV filters and edge detection techniques.
- Applied efficient backend processing using Python and OpenCV.
- Tools Used: Python, OpenCV, NumPy, Matplotlib.

Technologies

Languages: Python, Core Java.

Web Technologies: HTML, CSS, JavaScript.

Object-Oriented Programming: OOPS Concepts, Data Structures, Exception Handling, Modular Programming

Databases: SQL, CRUD Operations.

Version Control: Git, GitHub

Tools: NLTK, Pandas, NumPy, Matplotlib, Seaborn, Tkinter, Random, String, File Handling, OpenCV, Scikit-learn.

Professional Skills:

Strong in Python, Core Java, OOP, Data Structures and Algorithms.

Experience in data preprocessing, cleaning, and validation using Python (Pandas) and SQL queries.

Familiar with data quality checks such as handling missing values and duplicates

Experienced in building ML(Logistic Regression, Support Vector Machine) NLP (TF-IDF, Text Vectorization, NLTK, Tokenization) and image-processing applications.

Strong understanding of Software Development Life Cycle (SDLC).

Microsoft Office (Word, Excel, PowerPoint).

Experience collaborating in academic project teams
